DETAILED ACTION

Response to Amendment

1. Applicant's amendment was received on 8/8/05 and has been entered and made of record. Currently, claims 1-6 are pending.

Response to Arguments

2. Applicant's arguments, see pages 4-5, filed 8/8/05, with respect to claims 1-6 have been fully considered and are persuasive. The rejection of claims 1-6 has been withdrawn.

Allowable Subject Matter

3. Claims 1-6 are allowed.
4. The following is an examiner's statement of reasons for allowance:

Claims 1-6 are allowed based on the persuasiveness of the arguments filed on 8/8/05 and for the reason that the prior art does not disclose or suggest in claimed combination "merging decompressed autonomic segments independent of any other autonomic segments associated with the image reproduction" along with all the other limitations as recited in claim 1 and the dependent claims 2-6.

The closest prior art, previously noted as Notredame et al. (U.S. Patent No. 6049390), discloses a system for high speed printing of pages obtained by merging one or more page elements. The system merges a plurality of image data in compressed form that represents a page. The merging is performed rapidly to keep up with a high speed printing device to which the compressed and merged image data making up a page will be transferred to for execution. Notredame fails to disclose merging decompressed data, the decompressed data is also not made up of autonomic segments. Notredame fails to disclose autonomic segments, which are segments of data that contain all the information necessary for the reproduction of a region of an image. Notredame instead discloses merging compressed data pertaining to the entirety of page elements for an entire page.

Therefore, because of these reasons, the claims are rendered allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. To further show the state of the art refer to U.S. Patent No. 6956667 (Delhoune et al.).
